ICG Main Coordinator, 19 November

To IAC

Greeting from the delegation of the International Miners' Coordination

Hello,

we are Divine and Eugene from Congo and Julian from Germany. We are here representing the International Miners' Coordination.

We would like to extend warm greetings from the International Miners' Coordination and its main coordinator, Andreas Tadysiak, to all participants of this conference. Many of you know him from the 3rd International Miners' Conference, and he wanted to attend this conference, but unfortunately he is unable to do so for health reasons.

With fascist government representatives taking the reins in many countries around the world, imperialist wars and hotbeds of conflict are intensifying, for example in Ukraine, Gaza, Congo and many other countries. The result is intensified attacks on the working and living conditions of workers and the population. International corporations and international finance capital around the world are profiting from the intensified exploitation of workers with the help of governments subservient to them.

The car workers and miners of the world, who create the value, see none of this wealth.

The new developments in the world are a great challenge for us, and those in power are trying to pit the workers of different countries against each other and divide our unity and international, worldwide cooperation and coordination.

Miners and automotive workers are closely linked, and the participation of a delegation of automotive workers in the 3rd International Miners' Conference was a great enrichment for us.

We have great confidence in the automotive workers and the workers of the world that we can overcome this division, and we are delighted to be able to participate in this conference. We wish everyone a fruitful exchange of experiences and discussions, and every success.

Let us take responsibility for each other and for social progress for ourselves, our children, the workers of all countries and humanity as a whole!

Good luck!

Andreas Tadysiak

Chief Coordinator of the International Miners' Coordination
