

3rd International Automotive Workers Conference November 16, 2025

Greeting Message of Birleşik İşçi Hareketi (United Labor Movement)

Dear ICOG

Thank you very much for your invitation to the International Automotive Workers Conference. We regret that it is not possible for us to come to India because many of our comrades are banned from international travel by the fascist palace regime.

It was very important for us to take part in your conference, to talk about the organizational problems experienced by the international working class and the search for solutions, to discuss and to find a way. Capitalism wants to prevent the struggle for freedom and socialism of the working class, oppressed peoples and women with the imperialist regional wars of resource division, which capitalism sees as a way out of the existential crisis experienced in the process of Imperialist Globalization, and the rise of new fascist movements around the world.

The internationalist struggle of the working class against imperialist globalization is needed and indispensable more than ever. The importance of your conference stands true in terms of presenting a perspective to the organizations and pioneers of the working class that will fight against the parties, organizations and people who say that they are "socialists", the cooperative union bureaucracy that betrayed the working class and who are hostile towards the struggle for the dictatorship of the proletariat.

As the Birleşik İşçi Hareketi (United Labor Movement), we wish you success in your conference.
